2016 - 2018

Secondary school (Murray Park Community School), Derby – *GCSE Certificate, Budapest*

Subjects: Business studies, Mathematics, History, English language & Literature, Geography

Languages

- Hungarian: native
- English: fluent

Summary

I'm a junior developer who first began learning through a Full-Stack Bootcamp and now focuses on creating my own projects on GitHub and expanding my portfolio. I enjoy solving problems, exploring new technologies, and turning concepts into working applications. My background in system administration gave me an understanding of how IT systems operate behind the scenes, while my hospitality experience strengthened my communication, teamwork, and adaptability. I'm now looking for an opportunity to learn from experienced developers, grow professionally, and contribute to meaningful projects.
